

OPTIONAL FORM NO. 10

UNITED STATES GOVERNMENT

Memorandum

DATE: 29 April 1963

TO :

FROM :

SUBJECT: Proposal # 209/63

[] proposal #209/63 for [] offers to construct a prototype enlarger using a coherent light source and spatial filtering in order to achieve high resolution capabilities of low contrast imagery. With the possible exception of the Laser light source which is currently under investigation it is felt that this office has sponsored research and development in the fields of spatial filtering liquid and plastic film gates and high resolution optics beyond the state of the art contained in this proposal.
